Steps to ensure your child’s smile lasts a lifetime

1 Regular check-ups
Help your child become familiar with the dental practice, and get important information and advice on how to look after their smiles. Dental decays are a common problem but they are preventable! By visiting the dentist as soon as your children’s first tooth appears or before the age of one, you can help your child grow with a healthy decay-free teeth. During the visits, dentists can check their teeths development and offer fluoride varnish if necessary to prevent decay.

Tooth Defender Tip
Make dental check-ups a fun habit for your child. Consider establishing a post check-up routine, like an invigorating outdoor activity or a trip to the library to choose a special book.

2 Limit snacks
Everyone has plaque bacteria in their mouth. When plaque bacteria mixes with sugary foods and drinks, acids are produced which can cause tooth decay. Every time your child eats sugary foods or drinks, they increase their risk of tooth decay. That’s why your child should limit the amount and number of times they consume sugary snacks or drinks each day.

Tooth Defender Tip
Pure fruit juices can also contain hidden sugars which can damage teeth, to avoid this consume fruit juices as part of a meal and limit the consumption to a small glass (up to 150ml)

3 Teach good habits at home

Tooth Defender Tip
You are an important role model, talk to your child about how great healthy teeth look and feel!

- **Brush teeth twice** a day with a fluoride toothpaste, before bed and on one other occasion
- **Supervise your child** during toothbrushing until they are at least 7 years old
- **Spit after toothbrushing** rinsing washes the fluoride protection away
- **Use mouthwash** to extend the benefits of brushing
- **Reduce** the amount and frequency of sugary food and drinks
- **Wear a mouthguard** when playing sports
- **Follow the brushing technique** below

...& REPEAT
Build good life-long habits with an easy replacement of the Colgate® 6+ Manual Toothbrush
